## EDUCATION

**Dharmsinh Desai University**                                              2019 – 2023
*B.TECH IN COMPUTER ENGINEERING*                                         Nadiad, India
**CPI – 8.61**

## EXPERIENCE

**Confidosoft Solutions Pvt. Ltd.**                                   Nov 2023 – present
*Software Developer*                                                   Vadodara, India
- Proficient in software development with **.NET, Angular** and **React**, plus strong skills in **SQL** and **NoSQL** databases.
- Skilled in implementing microservices architecture and asynchronous messaging with **RabbitMQ**.
- Well-versed in **DevOps practices**, including CI/CD pipelines and deploying .NET applications using **Docker** and **Kubernetes**.
- Led migration of **OData WCF services** to **gRPC**, achieving a **90% reduction in response time** with a generic **BaseService**.
- Developed real-time locking with **SignalR**, enabling caching and user notifications with refresh and reconnect support.
- Transformed a **WPF application** into a web app with **Angular** and **WPF WebView**, resulting in an **85% reduction in loading times** and a **95% improvement in user experience**.

**Neopric Inc.**                                                       Dec 2022 – Oct 2023
*Software Engineer*                                                    Saint John, Canada
- Expertise in architecting and developing robust APIs with **.NET Core** and **React.js**.
- Skilled in **Docker**, **Kubernetes Helm**, **Azure Kubernetes Service (AKS)** and **Azure** for efficient application deployment.
- Well-versed in creating **CI/CD pipelines** for automated code delivery to production.

## SKILLS

- C#
- .Net Core
- .Net Framework
- Angular
- React
- Python
- Node Js
- Javascript
- SQL
- MongoDB
- RabbitMQ
- Redis
- Kubernetes
- Docker
- Data structure
- Algorithm

## PROJECTS

**Online check in for hair salon (reduce wait time)**                             2022
- It is a web application that provides all nearby salons details from **Customer's current location**, it also displays provided services, hair stylers and number in queue with approximate timing so waiting time of customer gets reduced.
- Salon Owners can add their salons details to this web application, Owner can manage services, stylers and customer appointments.

**Technologies:** React, Express js, MongoDB, Cloudinary

## ACHIEVEMENTS

**3 star in Codechef ( Max. 1776 )**

**Solved 300+ DSA problems on various online judges.**

**Competitive coding, Rank 086 in Aug START9C, Codechef**                           2020
